

Business-Messe Bright Green im Rahmen der Klimakonferenz COP15

The Austrian Trade Organisation represented during the Bright green expo, a parallel-event to COP15 in Kopenhagen Austrian companies who are counting worldwide to the pioneers for energy and environment technology.

PROGIS was represented with it's unique holistic agro-software-technology, which is set up on the 4 pillars:

1. Geography and mapping as base for any planning
2. AGROffice-DokuPlant a tools for planning, execution and control of all activities
3. Logistics for large farm management, for group of farmers, for service providers to optimize communication and single working processes
4. Precision and virtual farming to optimize fertilizing, spraying and irrigation and to merge virtually single fields to save handling expenses.

PROGIS tools help to reduce CO₂ emission or lead to carbon sequestration, they help to cultivate fields in a sustainable manner and to keep soils and the environment in a good condition for our offspring.
