

Frutic Chile 2009

The 8th **Fruit, Nut and Vegetable Production Engineering Symposium** (“FRUTIC Chile 2009”) that is organized in a 4 year rythm on diffreent locations of the world took place in **Concepción – Chile** from January 5 – 9, 2009.

The Ministry of Agriculture of the Government of Chile, Istituto de Investigaciones Agropecuarias INIA, invited **PROGIS** to present its technology for agricultural areas. INIA is looking beside other Southamerican countries for holistic solutions to keep track of Chile`s agricultural challenges.

In general, the demand for meeting these agricultural challenges in South America using information communication technologies is enormous. The solutions as proposed by **PROGIS** technologies were received with great interest by all participants. Beside other high ranked persons also the President of the Chilean Chamber of Agriculture took part at the opening ceremony.

Pilot projects are being planned and the search for local sponsors/investors has begun.

We would be happy to hear from you, if you are interested in investing in this market with a promising future.
