

On 7th and 8th of June 2011, a group of experts met in Amman-Jordan to find out best GIS based applications to boost agricultural development in WANA region. The meeting was arranged by AARINENA, the association of Agricultural research institutions in the Near East and North Africa. It is the mission of AARINENA to contribute to the enhancement of agricultural and rural development in the WANA Region, and PROGIS was invited as well known expert for practical and sustainable solutions to take part. WANA region comprises all countries from Morocco to Turkey including the Arabian peninsula.

The AGRO-ICT-Backbone-model consisting of aerial BING images of Microsoft, AGRO-ICT applications of PROGIS and weather and soil sensor data provided by two Austrian telemetry providers was very appreciated. For more information pls. send a message of strobl@progis.com
